#### Two Shooting Incidents In Quebec Cited

OTTAWA, Aug. 12.—(CP)—Commissioner S. T. Wood of the Royal Canadian Mounted Police said today that two shooting incidents which may have been connected with serving by the R.C.M.P. of call-up notices had been investigated but that the force "has not met with any armed resistance in the province of Quebec or elsewhere." An arrest had been made by Quebec provincial police.

The commissioner said he knew of no other incidents of a similar nature.

Last night a source closely associated with the enforcing of call-up notices had reported that two Quebec City areas there had been several instances of R.C.M.P. constables being fired upon, one of which was "serious." He said no injuries had been reported.

**ARREST WAS MADE**  
The other occurred between Montreal and Quebec, "under similar circumstances," when a shot was fired at an automobile similar to one used by the R.C.M.P. An arrest had been made by Quebec provincial police.

The commissioner said he knew of no other incidents of a similar nature.

Last night a source closely associated with the enforcing of call-up notices had reported that two Quebec City areas there had been several instances of R.C.M.P. constables being fired upon, one of which was "serious." He said no injuries had been reported.

**CONFIRMS REPORTS**  
The commissioner confirmed reports of the Galtineau incident and the one in Quebec this afternoon. Earlier, commenting on a report that "armed resistance" had been encountered in the Quebec City area, the commissioner said:

"The Royal Canadian Mounted Police has not met with any armed resistance in the province of Quebec or elsewhere."

That statement, he said, was as far as he knew a reply to questions about armed resistance in R.C.M.P. operations not only in connection with the call-up regulations but also in the handling of desertions from the armed forces.

Questioned specifically as to whether his statement was to be taken as a denial of the East-Adelaide incident as well as the reports of Quebec resistance, Commissioner Wood said:

"I am not altogether definite on the East-Adelaide business. It is not certain that there was any intentional shooting."

The commissioner said that close inquiries had been made by Ottawa headquarters of the R.C.M.P. following publication of reports of incidents involving enforcement of call-up regulations by the Royal Canadian Mounted Police and that statement that there had not been any armed resistance was based on those inquiries.

**Sub Chaser Sunk**  
LONDON, Aug. 12.—(CP)—Free French headquarters announced today that the submarine chaser Reine had been sunk through enemy action.

### Married Men

#### May Be Called In September

By B. T. RICHARDSON  
Edmonton Bulletin Online News  
OTTAWA, Aug. 12.—Exhaustion of all categories of manpower now eligible for the army draft is foreseen within a month, at most, with probable extension of the call-up to married men coming in September in order to complete army requirements of 200,000 men in that month.

With the best authority an estimate obtained today indicated that complete exhaustion of Canadian military manpower, except by a progressive shut-down of either munitions or agricultural production to release more men for armed service, may be expected within two or three months at best.

**HOLD CONFERENCE**  
Manpower problems remained the No. 1 issue of Parliament Hill today as Hon. Humphrey Mitchell conferred with provincial chairmen of the National War Labor Board, summoned to Ottawa for a three-day conference on war labor regulations and future prospects. Among representatives present were Hon. S. F. Parker of Saskatchewan, Hon. E. C. Manning of Alberta, and Hon. G. M. Stewart of British Columbia.

The provincial chairmen will discuss national labor problems not only with Mr. Mitchell, but also Elliott M. Little, national director of selective draft, and Hon. J. L. Mackenzie, minister of finance.

Close observers of the manpower crisis believed that one factor has begun to ease the critical shortage confronting the army. During early months of 1942, the additions to munitions factory personnel averaged 25,000 persons per month. But this figure has begun to decline, a leveling-off process is apparent in the munitions industries.

**RECRUITING STEADY**  
At the same time, voluntary recruiting has been maintained at 10,000 men per month, with the draft taking around 1,000 men per month, until the July, August, September calls, were increased to provide 60,000 men per month.

Since the army has greatly increased its training staff by releasing a picture of the army, it is expected that the draft will remain around 20,000 men per month for the few months.

But the question whether munitions or agricultural production should be curtailed in order to increase the armed services will have to be decided by the cabinet.

Army increases for 1942 have already reached the level forecast last winter when army requirements of munitions were first estimated at 100 to 150,000 men.

**Ship "Jasper" Launched In East**  
AN EAST COAST CANADIAN PORT, Aug. 12.—(CP)—Another 10,000-ton cargo vessel was christened and launched here at a brief ceremony today. The vessel was named "Jasper Park" by Mrs. H. A. Crawford of Montreal. Shortly after the christening ceremony, the ship was to be launched for the construction of another vessel of similar type.

**Wins First Heat**  
GOSHEN, N.Y., Aug. 12.—(BUP)—Major Sidney Parsons, E. W. S. Kane, first vice-president of the Canadian War Veterans Association, has been named as the winner of the first heat in the 100-yard dash.

**Power In London**  
LONDON, Aug. 12.—(CP)—Hon. G. Power, Canadian air minister, arrived in London today.

**WRITER WARNS ALLIES:**

**Must Expect More Pacific Defeats**

By ROBERT BELLAIRE  
ABOARD S.S. GRIPSHOLM, RIO DE JANEIRO, Aug. 12.—(BUP)—The United Nations must be prepared for more defeats in the Pacific Ocean, in the opinion of observers aboard this repatriation liner, and chances for unknown success in operations such as the present U.S. naval attack on Japanese bases in the Solomon Islands probably are remote.

Those of us on the Gripsholm,

### Edmonton Airmen Describe Super-Blitz On Nazi City

LONDON, Aug. 12.—(CP)—The London Star said today that "reports suggest" United States Marine landing parties in the Solomon Islands "have been strengthened and are making some progress." The paper said the Marines, "who are believed to have captured a large number of special types of artillery and light bridgeheads they established on Friday and Saturday."

By The Canadian Press  
Sea-borne United States invasion forces, officially described as trained in "new tactics to the business of killing Japs," battled the enemy in fierce hand-to-hand fighting in the Solomon Island jungle 500 miles north-east of Australia, today, and the navy in Washington declared.

"The Marines have opened the door to an Allied offensive in the South Pacific and today a one-way base 'there is a general feeling' that our forces are still making progress toward their objective—the occupation of the islands in the Tulagi area."

**DETAILS LACKING**  
The correspondent said "United States Marines and other troops" apparently were firmly established in their counter-invasion of the island.

While detailed information is being developed in the five-day-old battle, a Washington communication declared operations "are continuing to be strategically important island of Tulagi, in the southeastern Solomon Islands."

**A Tokyo broadcast, quoting**  
the Japanese navy, said that naval spokesman at Shanghai, persisted in the fiction the battle was a "strategic victory" for the Japanese navy, but that the Japanese navy was "not yet in a position to declare a decisive victory."

**CLAIM U.S. "DEFEAT"**  
Capt. Kamada was quoted as declaring that the Japanese navy was "not yet in a position to declare a decisive victory" for the United States forces—version in sharp conflict with Monday's announcement by Admiral Ernest King, commander-in-chief of the United States Pacific fleet, from Washington and Australia.

**REPORT FORMOSA BOMBED BY ALLIES**  
CHUNGKING, Aug. 12.—(AP)—It was rumored here tonight, without confirmation, that Allied warplanes bombed Formosa today. This Japanese island off the east China coast is one of Japan's principal troop staging areas for offensive operations.

**Report Formosa BOMBED BY ALLIES**  
CHUNGKING, Aug. 12.—(AP)—It was rumored here tonight, without confirmation, that Allied warplanes bombed Formosa today. This Japanese island off the east China coast is one of Japan's principal troop staging areas for offensive operations.

### Danes Willing Continue Fight To Beat Nazis

No matter how long German occupation remains in Denmark, the Danes remain true to their ideals. His Excellency Hendrik de Kuffner, Danish ambassador to the United States, assured a joint meeting of the Men's Canadian club and the Canadian Chamber of Commerce at the Macdonald hotel Wednesday.

The meeting was arranged in the ambassador's honor by the Chamber of Commerce.

He painted a picture of Denmark prior to the Nazi invasion stating that the Danes were a friendly, industrious and contented people in spite of threat of oppression.

He verified his claim to Danish faith in their country by describing the plebiscite of 1928 at Schleswig, in which the inhabitants of these provinces voted strongly in favor of coming under Danish rule after 50 years of living under Prussian rule.

He stated with confidence that the day will come when the Danes will again be able to enjoy their fairly high standard of living and their friendly life.

**AT HEAD TABLE**  
Seated at the head table were His Honor Lt.-Gov. J. C. Bowen; Acting Premier N. E. Tanner; Acting Mayor Sidney Parsons; E. W. S. Kane, first vice-president of the Canadian War Veterans Association; and Colby Ham, first vice-president of the Canadian War Veterans Association.

**AT HEAD TABLE**  
Seated at the head table were His Honor Lt.-Gov. J. C. Bowen; Acting Premier N. E. Tanner; Acting Mayor Sidney Parsons; E. W. S. Kane, first vice-president of the Canadian War Veterans Association; and Colby Ham, first vice-president of the Canadian War Veterans Association.

### SOVIETS FALL BACK

#### Nazis Score New Advances

By The Canadian Press  
Hitler's field headquarters claimed sweeping new successes in the battles of the Don River and the Caucasus today while the Russians announced a new German advance toward Stalingrad on the Volga and declared whole cities were aflame on the trail of the Nazi invaders.

Soviet dispatches said huge masses of German tanks supported by planes ripped into the Russian line northeast of Kotelnikovo, 35 miles south of Stalingrad, and broke through the Red army defenses.

The assault was finally stopped, Red Star said.

German headquarters flashed a series of claims asserting the bulk of the Russian 62nd Army and the 1st Tank Army had been "annihilated" in the Kalach sector, 30 miles northwest of Stalingrad, with 35,000 Red army soldiers taken prisoners. Since July 23, the Germans said, the Russians have lost 57,000 men, more than 1,000 tanks in the flaming Don river bend.

**HUGE CLAIMS**  
The German high command declared 1,047,474 Russians had been captured since Jan. 1 along with the whole battlefield.

A Nazi communique conceded

### R.A.F. FIGURES

#### 13,000 Tons Of Bombs Hit Nazis In 2 Months

By WILLIAM B. DICKINSON  
LONDON, Aug. 12.—(BUP)—The Royal Air Force dropped 13,000 tons of bombs on western Europe during June and July in attacks more devastating than any in the history of the war.

The 13,000 tons of bombs hurled on the cities of Germany and targets in the occupied countries by the R.A.F. and the U.S.A.F. during June and July represented an increase of about three and a half times the weight of bombs dropped by the R.A.F. in the same period of 1940 when 3,500 tons were used. In June and July of last year the R.A.F. dropped 8,500 tons.

While the summer months offer the best weather conditions for large-scale bombing operations, the attacks would continue to grow this fall and winter.

More than 400 tons of bombs were dropped on Danzig Sunday night, in what was described as "only an ordinary-scale attack" by a force of 100 bombers.

Even so this attack was stronger than the Luftwaffe's greatest effort during the battle of Britain.

The German's biggest attack on London—the night of April 16, 1941—hammered the city with less than 450 tons of explosives and incendiary bombs, dropped on the night of May 16, 1941.

What was described as "a typical heavy German attack" at the peak of the Luftwaffe's effort were the raids on London on the night of Oct. 15, 1940, with 220 tons of bombs and the attack on Coventry on Nov. 14, 1940, with less than 200 tons.

**British Bombers**  
RAID BURMA BASES  
NEW DELHI, Aug. 12.—(CP)—R.A.F. bombers roared over Burma Monday for the second time in two days, blasting targets in the Moulmein area, a headquarters communique said.

The bombers, all planes returned safely.

### India For Indians, Or The Jews?

The Moslems in India show no disposition to join the Hindus against the British because the British refused to turn them over to Hindu rule. Neither do the Sikhs, nor the Gurkhas, nor the Athans, nor the hill tribes on the Northwest frontier.

And that is precisely why the "row" is all about it. It is not a question of home rule for India; that has been promised, and could have been secured long ago if the British had been sincere in their promises. The British have refused to turn India over to Hindu rule and the other races will follow.

There are 80,000,000 Moslems, and the other non-Hindu races bring in a disident minority up to 100,000,000. The Congress party does not include all the Hindus, but a majority of them. Unless the Congress party were to include all the Hindus, they will exert themselves to prevent their rabble following provoking a war with the British. The British have more than 300,000 fighting men of the northern provinces, far more than a match for three hundred million sheep.

As the situation now stands, there is only one thing for Britain—and its Allies—to do. They must keep faith with their friends, and their friends are the warrior races who refuse to turn India over to the rule of Gandhi and his associates.

If the latter have any real concern for India, and are not purposely playing into the hands of the British, they should see the wisdom of calling off the general strike, stopping the riots, and postponing the whole controversy until it has been decided that Britain will have a "say" as to the future status of India.

### The Sky Is The Limit

Britain wants more bacon from Canada: a hundred million pounds more than we are supplying it this year.

There seems to be a shadow of doubt whether this year's quota of 600,000,000 pounds can be made up by the time the contract expires, in October, though the supply for the home market is being kept away below the normal demand. To fill a 700,000,000 pound order during the coming year would involve hog production out of all relation to this country.

In 1933 hog gradings in Canada numbered 3,245,523. They jumped nearly a half million in 1939, went up to 5,156,000 in 1940, climbed to 5,700,000 in 1941, and may reach 7,000,000 in 1942.

To meet the added demand from Britain, supply Alaska in accord with the desire of Washington, and larger quantities will be needed to Newfoundland, provision British warships calling at Canadian ports, and leave a somewhat more liberal bacon supply for home consumption.

The exceptionally heavy grain crop of 1942 came in good time. It is particularly fortunate that the wheat acreage this year is down about 10 per cent from the acreage in 1941, and that the grain is heavy.

With an ample supply of feed thus in prospect, western farmers are in good position to take advantage of this opportunity.

There is the further encouraging circumstance that so far as the federal officials in the department of agriculture can see farmers "can go on without hog production without fear of glutting the market."

### No Place To Leave Them

United States naval and military chiefs warn the public to expect news of heavy losses when the final reports come from the Solomon Islands.

This possibility the war directors of course foresaw when the attack on the islands was planned. The objects to be gained were considered in the light of the worst risk that had to be run. Else nothing more than hit-and-run tactics would have been attempted.

Only men trained in jungle warfare can know for certain what these objects are. But the reader who has been following the war news with a map at his elbow may guess some of them.

The Solomons lie along the shortest sailing route from the United States to Australia, although the nearest land route for enemy air and naval bases to the left there can be broken up. The islands would be useful also as Allied bases from which to attack other enemy-held islands to the west and north.

There is another reason, less obvious but highly important, why it is desirable to oust the Japs from the Solomon group. To the south, no farther away than Australia, lies New Caledonia. That island is mainly composed of iron ore, and other metals of the highest military value.

Except possibly for the oil wells it has secured, Japan would be a gainer if it could get the iron ore from New Caledonia. It has grabbed in exchange for this Free French island. For ten years before the

war the Japs were hauling away iron ore from the scrap heap. It was iron ore, not the scrap heap, that was the prize, that they obtained the bulk of the steel for the ships and guns and tanks they are now employing against the Allied forces.

New Caledonia is one South Pacific island the Japs will never occupy if the Allies can muster strength to hold it. Whatever sacrifice may be involved, the Solomons lie too close to that priceless island for the enemy to be allowed to remain there.

The people of Canada marked the birthday of Queen Elizabeth by sending her \$85,000 worth of gifts. The value of the gifts was not the only thing that was important. The gifts were a symbol of the love and loyalty of the Canadian people to their Queen.

## India Is Now Canada's Third Largest Source Of Imports

By EMPIRE TEA BUREAU, TORONTO

The new season is a timely reminder of the extent of the United Nations' dependence on India. The vast Asiatic sub-continent is one of the world's great sources of raw materials and foodstuffs.

The world and its plantations, farms, forests, factories and mines are an abundant source of all kinds of products, both raw and manufactured, and vital to the allied countries.

Since the loss of the Straits Settlements and the Dutch East Indies, India has become Canada's third largest source of imports. Among the products imported from India are tea, jute, peanuts, vegetable oils, spices, chrome ore, and cotton.

The bulk of India's wealth is derived from the agricultural sector, which produces 75 per cent of her gross national product. The remainder is made up of industry and commerce.

Tobacco is grown on a million and a half acres which yield a crop of 100,000 tons. Another four million acres are taken up with the production of sugar. In 1940-41, they produced a crop of 1,000,000 tons.

The production of sugar is one of the most important agricultural products of India. It is a major export, and is valued for its medicinal properties. The sugar industry is one of the most important in India.

## Alberta District News In Brief

### Father, Daughter Hurt In Accident

**SAWYER**—Last week, L. H. Kirkpatrick and daughter, Helen, were enroute home from Edmonton. Their car was wrecked near Chateau, Mr. Kirkpatrick sustaining a badly wrenched neck and suffered shock while Miss Kirkpatrick was taken to the Camrose hospital for medical treatment. She was shocked and badly bruised about the legs.

The accident occurred when Miss Kirkpatrick, who was driving, put on the brakes on a wet stretch of road. The car skidded into the ditch where it overturned pinning both occupants beneath.

Robert Anderson, whose commercial garage was entirely destroyed by fire on July 23, has purchased the Massey Harris building and had it moved to his old site.

A Jolly farewell party was tendered Mrs. Edward Love, formerly Miss Anne Storvig, and her sister, Sigurd Gjelsvik, on Sunday at the home of their parents, Mr. and Mrs. R. Storvig. Mrs. Love leaves shortly to join her husband, Capt. E. Love, in Montreal where his Gjelvik and children go to Wetaakwin where his Gjelvik has employment. Mrs. Love leaves with Mrs. Lawrence Love and Miss Delores Love, Edmonton, were among out of town guests.

### Children Get Lions' Outing

**LACOMBE**—Members of the Lions club gathered together all children in need of a day's outing at the beach on Sunday, together with a number of children of the members and took them to Brewster's Beach, Gull Lake, for an outing. President E. A. Bowering and a large committee of Lions were in charge.

Lacombe old-timers' baseball team turned in their second win on Sunday when they defeated a team from the Fairview district, 2-0. Ernie Jeggum and Joe Baldwin traded shutout ball for the winners until the eighth inning, when the Fairview team got their two runs on Moffatt Lett took over the pitching and the winners committed a couple of errors.

**REV. A. L. Carr**, pastor of St. Andrew's Church and president of the Alberta Conference of the United Church, left on Monday to attend the annual meeting of the United Church in Belleville, Ont. Enroute to the meeting he will visit friends in Chicago, Toronto and Ottawa. He recently returned from a tour of the Peace River district.

### Woman Hurt As Car Turns Over

**CLIVE**—Mrs. Oscar B. Goggin and Mrs. D. Northcott narrowly escaped serious injury when the car in which they were riding rolled over and landed upside down in a ditch. Mrs. Wagner sustained a cracked hand in the accident which was caused when the car skidded on the slippery road.

Funeral services were held in the Clive United Church recently for J. McWilliam who died after a lengthy illness. He leaves his wife, four daughters and two sons, both serving with the armed forces. Rev. F. Foster officiated.

A surprise party was held by the Clive young people for the home of Mrs. McCormick, for Misses Helen Harrow and Marjorie Stedman, who are leaving to attend the coming normal school session in Edmonton. Each girl was presented with a gift at the conclusion of a lovely lunch. Miss Margaret McCormick was hostess.

J. H. Harrow, Searle grain agent, who is Clive's scrap metal converter, shipped a carload of scrap metal east recently. J. M. Martin, salvage converter for the Red Cross, also shipped a carload of mixed salvage collected during the Red Cross campaign.

**HANNA**—Mrs. Wallace J. Crawford leaves on Thursday morning's train to visit with a brother, J. Heffernan, at Kelvington, Sask. She will then continue her trip to Kaskawabie, Ont., where she will stay with a daughter, Mrs. C. E. Anderson and Mr. Anderson, later visiting with relatives in Port Arthur and Fort William, returning to Hanna about the end of September. Mr. Crawford expects to visit with another daughter, Mrs. T. C. Anderson and Mr. Anderson at Victoria, B.C., in the meantime.

**HANNA**—Albert O'Reilly and Luther Paupel have received their calls for military service.

### Alberta Beach Red Cross Unit Collects \$900 By Activities

**ALBERTA BEACH**—The Alberta Beach branch of the Canadian Red Cross has raised approximately \$900 since its organization in 1940 and with a present membership of 20. Funds are raised by whit drives and the sale of home-cooking and sewing. At the last home-cooking sale more than \$100 was realized.

On August 13 a Scotch tea will be held in the new community hall.

Mrs. M. L. Stocks is president.

### Biggest Fair In 50 Years Is Held At Red Deer Three Days

**RED DEER**—Red Deer's 32nd annual fair closed here Saturday night after three past-date-breaking days in which all record-breaking attendance figures were smashed.

Presence of the Royal Canadian Mounted Police Training Centre in Red Deer and No. 36 Service Flying Training School, Royal Air Force, at Pithou, a few miles south, helped swell exhibition crowds.

Vic Bjorkeland, president of the Red Deer Agricultural Society, D. W. Robertson, secretary, and their directors, had put in months of hard work in getting ready for the show and its success was very gratifying to them, they reported.

It was the biggest fair in the 50-year history of the society.

President Bjorkeland officially opened the fair on Friday afternoon, being introduced by Mayor E. S. Hogg of Red Deer.

There was horse racing on Friday and Saturday afternoons.

**LIVESTOCK**

Main feature of the exhibition was the livestock showing. Horses, cattle, sheep and swine were all well represented and the Red Deer district exhibitors did well against strong outside competition.

The Canadian Women's Army Corps had a special recruiting party at the fair, with Capt. M. Pearl Brent, C.W.A.C. staff officer at Calgary, in charge of a party of girls. Some recruits were obtained.

The Canadian Red Cross received a handsome donation as the proceeds of a raffle on a calf. Thos. Baines, farmer of the Red Deer district, donated a registered Jersey heifer to the fair board, which hundreds of tickets were sold. When the draw was made on Saturday evening, Walter W. Wainwright, Red Deer, was holder of the winning ticket.

**RACE RESULTS**

Grandstand crowds saw some good races when programs were presented on the half-mile track on Friday and Saturday afternoon.

Results were:

**FRIDAY AFTERNOON**

Half-mile pony race—1. Gooty, owned by George Denny, Pithou; 2. George Denny, Pithou; 3. George Denny, Pithou; 4. George Denny, Pithou; 5. George Denny, Pithou; 6. George Denny, Pithou; 7. George Denny, Pithou; 8. George Denny, Pithou; 9. George Denny, Pithou; 10. George Denny, Pithou; 11. George Denny, Pithou; 12. George Denny, Pithou; 13. George Denny, Pithou; 14. George Denny, Pithou; 15. George Denny, Pithou; 16. George Denny, Pithou; 17. George Denny, Pithou; 18. George Denny, Pithou; 19. George Denny, Pithou; 20. George Denny, Pithou; 21. George Denny, Pithou; 22. George Denny, Pithou; 23. George Denny, Pithou; 24. George Denny, Pithou; 25. George Denny, Pithou; 26. George Denny, Pithou; 27. George Denny, Pithou; 28. **U.S. Army To Be Allowed To Cut Taxes In Alabama**

### Trees in Alberta

An order-in-council has been passed by the provincial government granting U.S. armed forces permission to cut down trees on crown lands for war purposes. It was reported Tuesday.

Timber may be taken for construction requirements of the Alaska highway and ancillary purposes, or to save of any kind will be

Hugh E. Pearson is chairman of the section and is in charge of recruitment.

Heads of the larger firms are being contacted and methods of payroll deduction towards war savings, as adopted by their firms, are being checked with a view of increasing savings where possible.

Required by the province, provided that the forest products are solely used for war purposes.

## Are Happy Marriages Fewer Than Yesterday?

Percentage Is The Same. But In Grandma's Day Divorce Was Considered A Disgrace; In The Old Days They Married "For Keeps"

A correspondent asks "Why are there fewer happy marriages now than there used to be?" Has domesticity played out and is marriage a failure, as many assert it is? Do the modern boy and girl make worse husbands and wives than their grandparents did? Do married couples make less effort to adjust themselves to each other now than they did in the past?

To all these questions the answer is "yes" and "no." There is no denying that the divorce rate has gone up since our grandparents' day, but probably the percentage of unhappy marriages was just as great then as it is now. The ideal marriage in which both parties get their hearts' desire and spend forty or fifty years in finding and cooling is just a part of the fiction of the good old times which, in reality, never were.

There have always been philandering husbands and nagging wives. There have always been husbands and wives who looked

glamorous before their marriages, and then, after they were married, they have always been

tyrants of both sexes. Uncongenial people who hadn't a thing in the world in common have always had a fatal passion for marrying each other. There have been single change in the matrimonial schedule since the first wedding took place.

The only difference is that in the past when people married wrong in picking out their mates, they swallowed their disappointment and kept quiet about it while we squawk to Heaven about how we got along. Grandpa may have gotten on Grandpa's nerves or bored him, but he didn't go around broadcasting his troubles and asking for a vote of public sympathy. Grandpa may have had a wandering eye, but Grandma pretended to know it and gave a lifeless intermission of "oh, happy, well, instead of taking the children and going back to Mother."

**MARRIED FOR KEEPS**

It was not because Grandpa and Grandma were more happily married than their grandchildren who they carried on, but because in those days people married for keeps and not for experimentation; and they made the best of their marriages.

Also, it was because divorce, no matter for what reason, was considered more or less of a disgrace. It was just something the people didn't do, unless it was being fashionable as it is now. No people carried their misdeeds, instead of swamping them off for something they hoped they would like better.

So far as women, who are the chief platters of the divorce courts concerned, the fact that most of them now are self-supporting makes them more choosy about their husbands than Grandma could have been. No matter how much Grandma may have lost her taste for Grandpa, she had to stick it and pretend to like it as it was her need to do. But now, when women can earn their own money and live, they don't have to endure him.

**Bulletin Patterns**

Send in the coupon for your copy of "How to Make Your Own Rug" to the Edmonton Bulletin Home Service, 60 Front Street, West, Toronto, Ontario. Be sure to write

plainly, name, address and style number.

Send your order to Pattern Department, The Edmonton Bulletin, 60 Front Street, West, Toronto, Ontario.

## Your Baby Points For Parents

By EDITH THOMAS WALLACE

6-12 This Not This

Mothers: "Baby's fussing means something. He's dry and I don't believe he's hungry. Perhaps he's just asking for a change of scene or position."

An attempt should be made to interpret baby's crying since this is his only means of telling us what he wants.

had complete satisfaction of this natural need may now be demanding that satisfaction in this particular. Perhaps if he is left alone, or his desire transferred to some rubber or celluloid toy which could be kept clean, he would eventually abandon this of his own accord. This answers your question, too, Mrs. K.

Our leaflet "Thumb-sucking," discusses this particular habit in both infants and children. It may be had by sending a 3-cent stamped, self-addressed envelope with your request to Myrtle Meyer Eldred in care of this newspaper.

McKenney On Bridge

By WILLIAM E. MCKENNEY  
America's Card Authority

Today's hand should be compared with yesterday's. The bidding is the same in both. South shows a major two-suiter. North denies spades but agrees to hearts. In yesterday's play West did open trumps. He came the nine of diamonds and declared guessed the Jack, forcing the ace. East led a second trump and South ducked. The trick was West's.

Duplicate—None vul.  
South West North East  
4♥ Pass 3♥ Pass  
5♥ Pass 3NT Pass  
6♥ Pass 4♥ Pass  
Opening—4♥ 11

West led a diamond and the king went up. The queen of trumps was overtaken by the ace, the declarer pulled East's last trump and gave up a trick to the king of spades.

But again West went astray by a misunderstanding of strategic principles. The trump lead here was wrong. West has too many spades for a trump lead. East is surely short of the suit, possibly shorter than dummy. It is not probable that declarer can get far by trying to ruff spade losers in dummy.

With a singleton trump, West may anticipate East has four and that he may have a low stopper. Much more prudent in principle appears to be to open diamonds, hoping to be able to force South.

If the four of diamonds is opened, South will lack an ace. South should return the suit. The king wins. South discarding a club. Declarer probably now tries to ruff out spades. The deuce of trumps is by but the ten is overtaken. East leads a trump to end the cross-ruff, and declarer is sunk.

## McCoys Health Service

In many ways the skin is one of the most remarkable organs in the body. The skin also acts almost as a mirror, and many disease conditions inside of the body are revealed through the state of the skin.

In today's article I will tell you something about the common skin disorders. Eczema and psoriasis may be said to be a chronic form of skin inflammation which results when a systematic toxemia is produced by the continued use of wrong food combinations. This creates an over-irritated state internally and brings on a skin irritation as this excess acid is eliminated by the body through the pores of the skin.

Acne is a skin disorder characterized by pimples and blackheads, in which, in addition to acids, there is a plugging or blockage of the oil glands of the skin. Some of the causes of acne are the consumption of greasy or rich foods, candy, constipation and improper cleansing of the skin.

Many people are troubled with hives, or nettle rash, which appears in the form of wheals accompanied by intense itching and a burning sensation. These wheals may be as large as a half dollar. A case of hives can only occur when the patient is suffering from a chronic acidosis, and each attack is preceded by digestive upsets, a coated tongue and perhaps headache. An attack may seem to follow the eating of certain foods, but is always preceded by some irritation of the digestive tract.

Erysipelas is an acute skin eruption and this disease is commonly associated with being caused by a certain germ and is believed to be contagious. The eruption consists of dark red patches which spread, accompanied by a swelling of the underlying tissues. The affected parts become painful and there is often an intense itching and burning. The most common form is that seen on the face. When the main cause of erysipelas is removed, you will surely take you out to dinner!

Dead white creams are very unbecoming. Tint your vanishing cream with a few drops of liquid rouge or red fruit coloring such as you use in cooking. You'll look good enough to eat—and you probably will. Your boy and girl will surely take you out to dinner!

# The War Today

By JOHN COLLINGWOOD READE

## World Atmosphere Electric With Impending New Action

THE atmosphere throughout the world is electric with impending action. In the Pacific, United States and Australian forces have opened an offensive against Japanese outposts which have taken weeks to prepare, and is being conducted on a massive scale.

In India the British government has decided that the exigencies of the military situation are such that political interference amounts to sedition and imperils the safety of the United Nations' cause.

It has therefore banded the members of the Working Committee of the All-India Congress Party into jail for the duration. Attempts by infuriated disciples of Mohandas Gandhi to stage violent demonstrations are being dealt with by armed police, and a curfew forbidding more than five persons to gather in one place at one time has been imposed.

**OMINOUS QUIET**  
In Britain all is ominously quiet, but a thousand incidents and statements point to feverish preparations for action.

The Commander-in-Chief of the United States Forces in Britain says he is equipped to handle American troops as fast as they arrive, and adds: "They are coming by thousands upon thousands."

He says he would like more time to train his staff and his men in joint operations with British ground and air units, but admits that he can speed up the preparations of his forces and declares that the sooner a second front can be opened the better.

Britain has practically completed the mobilization of middle-aged women, and is rapidly completing the operational training of Home Guard units. Vastly expanded fire-fighting services have been trained with the obvious intention of entrusting to these auxiliary forces the maintenance of the industrial plant and the defence of the British Isles while the Anglo-American armies are engaged in action abroad.

**ITALY-NORAD PINGER FAILS**  
In Egypt and the Middle East, the land action is confined to artillery exchanges and the occasional clash of armored patrols which are for ever feeling out the enemy's positions and attempting to discover his latest intentions.

On the Russian front, the Germans are pushing on relentlessly, pushing their offensives against the Russian defenses with every weapon they can command.

For the past forty-eight hours, the British were slow to complete a revolution in their thinking and realize that a great naval power could no longer place supreme reliance on naval forces.

But the British were not so slow to realize this that they failed to develop what was for them the best organized air force in the world, having the latest concepts of aerial strategy and equipped with aircraft better suited to their military task than any possessed by their enemies or their allies.

In this respect, the British had out-thought the Germans, who were so obsessed by the fact that they were a military power that both their aircraft and their air strategy were primarily, if not exclusively, suited to co-operation with ground forces. The result was the Battle of Britain, which broke the back of Germany's first air force strength.

**DON'T FORGET THESE**  
Those who remember the delicacies that caused the loss of Singapore and Tobruk are inclined to ignore the victories at Cape Matapan and the Battle of Taranto Bay, the triumph in East Africa, the smashing of the first Axis force in North Africa, the frustration of the seccop, and the capture of Syria, while the delaying actions were being fought in Greece and Crete.

The capture of Syria was a tactical victory of first importance, for it prevented Germany from getting into the Middle Eastern countries and threatening Suez from the east, while cutting the Russian supply line from the Persian Gulf.

It is quite true that serious errors of judgment have been made great deal to save shipping, while the British military operations in Iraq, Iran and Syria permitted the construction of the Iranian railway, British materials and rolling stock.

They forget that while they were shouting loudly for the capture of Madagascar, the British government had foreseen the strategic necessity which had just dawned upon it, critics all of three months earlier and had despatched an expedition which arrived there in time.

**WON ALL CRUCIAL FIGHTS**  
The writer had an opportunity last summer of seeing a good deal of British military production and putting to sea in a destroyer. What he saw of the Royal Air Force Coastal Command and of British naval planes in home waters does not suggest incompetence, stupidity, lack of the fighting spirit or inferiority to the enemy in technical accomplishment.

At this critical period of the war, when the heaviest demands must be made upon Allied fighting forces and those who work to keep them in the field, the question of morale is an important one. Morale is a word used to indicate the general state of mind of the group of people to whom it is applied.

The morale of the civil population in a nation at war is a good only if it is conducive to a vigorous and constructive support of the cause. The fact that the people are neither war-weary nor depressed is not enough. They must have both faith and determination.

Our morale is not particularly good in some sections of society. It is part of the intellectual fashion to be brightly cynical instead of constructively critical.

"Isn't it terrible," says young Mrs. Smith, with an archly humorous face as she passes the thickly leaved. "We are losing the war on all fronts." At which Mr. Smith assumes a firmly masculine and oracular expression, pours himself another cocktail and says: "Well, what can you expect. We have made such an incredible number of blunders."

**ON CREDIT SIDE**  
It is quite true that serious errors of judgment have been made great deal to save shipping, while the British military operations in Iraq, Iran and Syria permitted the construction of the Iranian railway, British materials and rolling stock.

They forget that while they were shouting loudly for the capture of Madagascar, the British government had foreseen the strategic necessity which had just dawned upon it, critics all of three months earlier and had despatched an expedition which arrived there in time.

**WON ALL CRUCIAL FIGHTS**  
The writer had an opportunity last summer of seeing a good deal of British military production and putting to sea in a destroyer. What he saw of the Royal Air Force Coastal Command and of British naval planes in home waters does not suggest incompetence, stupidity, lack of the fighting spirit or inferiority to the enemy in technical accomplishment.

The detection equipment, the armament, the protective devices, the technique of cooperation with shore-based aircraft is an impressive fact that two destroyers are capable of giving safe conduct to a fleet from enemy to sixty merchant vessels moving with train-like regularity every single day through waters within comfortable range of German aircraft, submarine bases and bases—waters which are, moreover, regularly swept with mines by night-flying German airplanes.

It is not to say that there have been no errors. There have been plenty.

Our business is not to resign ourselves to the inevitability of blunders somewhere else. It is to try to make sure that our own blunders can be avoided as far as possible in our own battles.

The British are all right; at least they can safely be left to their own critics. They have made their mistakes, but they won important victories at crucial points, which is the only reason why there is a war left for any one to fight. They have lost all the battles where the fate of the Allied cause did not hang in the balance and won all the battles where it did.

**CONSTRUCTIVE THOUGHT NEEDED**  
The enemy has been checked wherever he threatened to drive the Allied nations out of places which were absolutely necessary for mounting counter-offensives. We still hold Egypt and the Sudan, though the enemy's breath is on our necks. We still hold the British Isles, with the enemy eighty miles away from London. We still hold most of the important bases in the Indian Ocean, and we still hold Australia and Alaska. The time to risk about losing the war is over; we lose all these.

In the meantime, there is a constructive job to be done. One must be intelligent in giving people talking about the war. We are losing the war. They say that there is nothing the Germans can do that we can't do; that the balance of advantage is in our favor; that if only we can find the means to use it; and they object to the "inferior as usual" attitude.

There is no doubt that if we would improve our morale, it would do us no harm. There is no question of rights as free born men and unfranchised citizens to prevent leakage, waste, inefficiency, incompetence, mismanagement and defeatism from impairing our strength for the coming battle. These things lie in our power to do.

Fatuous optimism or "whopping it up" with carnivals and brass bands is a sign of good morale. Nor is unreasoning pessimism.

There was evidence of accidental nature and there was no evidence of sabotage. It was a great mistake of the fire was accidental. It spread was due to a great mistake of the failure of the plant management to provide adequate fire protection. He was referring to the management of the Millbrook Works, where two naval vessels under construction were destroyed.

**Penny Candy**  
MONTREAL, Aug. 12.—(CP)—Montreal candy manufacturers yesterday agreed to carry on making penny candies despite new taxation and other considerations. "They'll be a bit smaller in size," said a spokesman.

showed it was of accidental nature and there was no evidence of sabotage. It was a great mistake of the fire was accidental. It spread was due to a great mistake of the failure of the plant management to provide adequate fire protection. He was referring to the management of the Millbrook Works, where two naval vessels under construction were destroyed.

**No Sabotage In Shipyard Blaze Inquiry Reveals**  
TORONTO, Aug. 12.—(CP)—Fire Marshal W. J. Scott, K.C., in a report to Attorney-General Gordon D. Conant, yesterday said that a two-day inquiry into the \$100,000 fire at Millbrook, Ont. July 14,

showed it was of accidental nature and there was no evidence of sabotage. It was a great mistake of the fire was accidental. It spread was due to a great mistake of the failure of the plant management to provide adequate fire protection. He was referring to the management of the Millbrook Works, where two naval vessels under construction were destroyed.

**Yank Fliers Hit Japanese Airport**  
CHUNKING, Aug. 12.—(AP)—United States fliers yesterday bombed the Japanese airbase at Nanchang, shot down one enemy plane in combat, probably destroyed another and returned to their base without loss, a communique from the U.S. Navy said. The fliers' headquarters announced today.

Five fliers were scored on the first day, directly on target and another between two hangars in the main hangar. The planes were known to be housed, the bulletin said.

## Don't Miss These Money Saving Values in Staples!

### Hemstitched Cases

- Fine quality Wabasco cotton.
- Bleached to snowy whiteness.
- Hemstitched border.
- Standard width, about 42 inches.

FEATURE VALUE PAIR **79c**

### Cosy Comforters

- Plump, soft, wool filling.
- Pretty flowered cotton print covering.
- Rayon satin panel to match.
- Bedroom shades—sizes about 60x70 inches.

FEATURE VALUE EACH **\$3.69**

### Krinkle Spreads

- Easy to wash, no ironing required!
- Heavy creamy colored cotton.
- Krinkle stripes in rose, blue, green or mauve.
- Double bed size, about 50x100 inches.

FEATURE VALUE EACH **\$2.19**

### Unbleached Sheeting

- Extra heavy weight—firm and sturdy.
- Creamy colored unbleached cotton.
- Hemmed to your specifications without charge!
- Width about 82 inches—
- Orders done in rotation.

FEATURE VALUE, YARD **53c**

### Chenille Type Spreads

- Intricately patterned in cotton chenille tufting.
- Firm cotton background—size about 90x100 inches.
- Two-tone effects—blue, rose, green, gold, mauve.
- Lovely choice for modern bedrooms!

FEATURE VALUE SPECIAL **\$7.95**

### "Endeavour" Sheets

- Smooth, heavy cotton, firmly woven.
- Bleached to a sparkling whiteness!
- Smartly hemstitched top border.
- Finished size about 80x100 ins.

FEATURE VALUE PAIR **\$3.88**

### Flannelette Blankets

- Soft fleecy flannelette texture.
- Plaid patterns on white background.
- Rose, gold, blue, green, mauve.
- Size about 70x84 inches, whipped ends.

FEATURE VALUE EACH **\$1.09**

### Tea Towels

- Firm linen-and-cotton weave tea towels.
- Quick-drying, hard-wearing for daily use.
- White, overchecked in blue, green, gold, red.
- Hemmed—finished size about 16x31 inches.

FEATURE VALUE EACH **29c**

### Bath Towels

- Serviceable cotton terry weave.
- White with soft pastel stripes.
- Good size, about 20x40 inches.

FEATURE VALUE, EACH **4 for \$1.00**

### Ecru Towels

- Large, thirsty bath towels.
- Soft, thick cotton terry weave.
- Ecru with bright stripes—about 20x40 inches.

FEATURE VALUE PAIR **69c**

—Staples, Main Floor
